steel clean

Nothing shows up marks like stainless steel. SteelKleen removes handmarks, smears, waterspots and casual grime with one easy wipe. Surfaces are restored to a brilliant even lustre with no annoying streaks and, unlike other cleaners, SteelKleen leaves an invisible film that repels new marks and splatters.

stick it

When it comes to suction, Howards Storage World know what sticks and only sell you branded quality products. With lots of cheap imitations on the market it is no wonder our customers tell us that our suction range sticks better than anything else they've tried. For perfect results always stick to a clean, smooth surface and never try to stick across grout lines.

material matters

If you are a little confused with the different selection of products, materials and prices when selecting the item that suits your needs best, use the following guide to help you to make your decision.

Chrome: An extremely popular choice. Always less expensive than stainless steel but with a shorter life span. Chrome will eventually rust, but if you compare life span against price, chrome is always a great choice.

Stainless Steel: Is much more durable. Rust-free with a longer life than chrome and will cost you a little more to start with.

Plastic Coated Wire: Has been a great favourite for generations and represents great value for money, suiting everyone's budget. Wire coated products will yellow and show signs of age quicker than chrome or stainless steel.

Plastic: A modern favourite. Good looking, durable, rust-free and priced to please everyone's pocket.
